Sub: Ineffective holding of BOXN & BCN wagons:

On analysis of position of ineffective holding of wagons by Board (MM & MT) it has been observed that there is discrepancy in the ineffective figures reflected in FOIS and the figures maintained by C & W Control.

It has been therefore, decided that the zonal railways should put in place a system for weekly reconciliation of ineffective wagons on the system (including POH wagons going outside workshop) so that correct entries in FOIS are ensured.

You are requested to take necessary action to implement above at the earliest under intimation to Board’s Office.
