Sub: Enhancement in Freight Loading during 2015-16

Directions have been received from the Hon’ble MR that Indian Railways should target to achieve a growth of 15% in originating freight loading during the financial year 2015-16 when compared to 2014-15. He has further directed that all departments should contribute towards achieving this target in mission mode and it should percolate down to every member of the railway family.

Hon’ble MR has also said that performance of each individual department will be evaluated against this common goal. This message may kindly be passed down to the officials of Mechanical Department at every level to make all-out efforts so that this target fixed by the Hon’ble MR is achieved in 2015-16.
