Sub: Installation of Display Boards on important stations depicting Project Status.

In last one and a half year, Indian Railways have focused on Capacity Enhancement projects such as Doubling/Tripling/Quadrupling, Satellite Terminals, Traffic Facilities, major passenger amenities etc. However, these are not getting appreciated by public at large due to poor communication. Therefore, it has been desired by Hon'ble Minister for Railways that proper display boards should be installed at prominent locations on important railway stations depicting the following:

1) A map showing the alignment and locations of such projects taken up on the route.

2) Brief description of each project including its length, cost, completion period, expected benefits (such as increase in number of trains, average speed of trains, increased safety, improved punctuality) etc.

Action taken on the above should be reflected in the MCDO every month.
